

# Danish Legal Gazette A

## Executive Order on rates for pilotage performed by the Danish Pilotage Service

Pursuant to the Danish Pilotage Act, cf. Act No 567 of 9 June 2006, the following is laid down:

**Section 1.** A charge must be paid for services provided by the Danish Pilotage Service.

(2) The size of the charge is set out in the rate book, which is attached to this Executive Order.

**Section 2.** The charges described in this Executive Order fall due for payment 30 days after the invoice date.

(2) If payment is not made promptly, interest is added to the amount due for the period from the last payment date until payment is made at the interest rate defined in the Danish Interest Act.

**Section 3.** This Executive Order shall enter into force on 1 October 2009.

(2) Executive Order No 976 of 20 July 2007 shall be repealed simultaneously.

*Danish Maritime Safety Administration*

Svend Eskildsen

/Birger F.N. Lind

**The Danish Pilotage Service’s (DanPilot’s) rate book**

Drawn up by the Danish Maritime Safety Administration

September 2009

## **Table of Contents**

- Chapter 1 : Calculation of the rate for pilotage services  
Chapter 2 : Examples  
Chapter 3 : Table for basic fee, supplements to basic fee, mileage charge, shifting and demurrage  
Chapter 4 : Distance table

## **Corrections**

Please send any comments on and corrections to the rate book to

Danish Maritime Safety Administration

Tel. +45 32 68 95 00  
Fax +45 32 57 43 41  
E-mail frv@frv.dk

## **Abbreviations**

- BR : The piloted vessel's greatest breadth (breadth extreme) in metres to two decimal places, cf. the vessel's international tonnage certificate.  
LG : The piloted vessel's overall length (LOA) in metres to two decimal places, cf. the vessel's international tonnage certificate.

## **1. Calculation of the rate for pilotage services**

### **1.1 Cost-based rates**

The Danish Pilotage Service's rate system is cost-based. The rates are adjusted in line with the general rate of inflation once a year.

### **1.2 Rate elements**

The rate for pilotage services consists of:

1. A basic fee. The basic fee is the same for all vessels. The basic fee is set out in Chapter 3.
2. A supplement to the basic fee. The calculation and size of the supplement are set out in Chapter 3.
3. Mileage charge per piloted nautical mile. The calculation and size of the mileage charge is set out in Chapter 3. The number of piloted nautical miles is set out in Chapter 4.

### **1.3 Beginning and end of the rate calculation**

The rate is calculated from the first time the pilot boards until his last disembarkment or until the last port with the pilot on board.

### **1.4 Shifting**

In the event of shifting at the same port, only a supplement to the basic fee is charged, however this must as a minimum correspond to the actual costs of an hour's shifting, cf. Chapter 3.

### **1.5 Demurrage**

1.5.1 The Danish Pilotage Service charges demurrage per hour commenced until the pilotage begins, cf. Chapter 3, when:

- pilotage does not begin within one hour of the agreed time;
- during pilotage a stop is made for provisioning, bunkering, planned machinery repairs or for some other reason not due to the pilotage or the vessel's navigation and the pilot remains on board; and when
- a vessel has run aground and a pilot is called to refloat the vessel.

1.5.2 When a pilot is called, travels to and/or attends in vain a pilotage service which in the meantime has been delayed or cancelled, the Danish Pilotage Service charges two hours' demurrage, cf. Chapter 3.

### **1.6 Reloading (STS – Ship-to-Ship - operations)**

The pilotage rate for reloading between ships (STS operations) is calculated separately as a pilotage service with a basic fee and a supplement to the basic fee, cf. Chapter 3.

### **1.7 Simultaneous pilotage of several vessels**

When a pilot operates several vessels simultaneously, the costs are divided, as is the rate for the vessels, at the Danish Pilotage Service's discretion.

## **1.8 Towing**

When towing is required, the deepest draught, the greatest breadth and the total length of the towing unit and towed unit together are used as the calculation basis for the supplement to the basic fee and the mileage charge.

## **1.9 Payment for other tasks**

When the Danish Pilotage Service solves a task which deviates from the norm, the Danish Pilotage Service enters into a rate agreement which reflects the costs it incurs in order to solve the task.

## **1.10 Payment for pilotage etc. outside the remit of the rate book**

Payment for pilotage etc. not covered by the rate book is set in an agreement made between the ship's master and the Danish Pilotage Service. The payment shall reflect the Danish Pilotage Service's costs associated with production of the service.

## **1.11 Travel expenses**

To cover travel expenses, 7% is added to the total of the basic fee, supplement to the basic fee, mileage charge, shifting and demurrage.

## 2. Examples

### Example 1: Piloted distance: Great Belt S to Kalundborg Road

Vessel	
LOA , LG	169.50 m
Breadth extreme, BR	23.75 m
Deepest draught	9.20 m
Factor, LG * BR	$169.50 \times 23.75 = 4025$

According to the distance table in Chapter 4, the distance between Great Belt S and Kalundborg Road is 63 nautical miles.

According to the table for supplements and mileage charge in Chapter 3, factor 4025 corresponds to line 16.

According to the draught table in Chapter 3, at a draught of 9.20 m the amount for the position seven lines under line 16 (= line 23) should be charged.

With line 23 as the input parameter in the table for supplements and mileage charge, a supplement of DKK 3,400 and a price per nautical mile of DKK 132 should be charged.

The price of the pilotage is then:

Basic fee:	2,575
Supplement to basic fee	3,400
63 nautical miles of 132	8,316
	14,291
Travel expenses 7%	1,000
Total for the pilotage	15,291

### Example 2: Piloted distance: Great Belt S to Kalundborg Port

Vessel	
LOA, LG	169.50 m
Breadth extreme, BR	23.75 m
Deepest draught	9.20 m
Factor, LG*BR	$169.50 \times 23.75 = 4025$

According to the distance table in Chapter 4, the distance between Great Belt S and Kalundborg Port is 69 nautical miles.

According to the table for supplements and mileage charge in Chapter 3, factor 4025 corresponds to line 16.

According to the draught table in Chapter 3, at a draught of 9.20 m the amount for the position seven lines under line 16 (= line 23) should be charged.

With line 23 as the input parameter in the table for supplements and mileage charge, a supplement of DKK 3,400 and a price per nautical mile of DKK 132 should be charged.

The price of the pilotage is then:

Basic fee:	2,575
Supplement to basic fee	3,400
69 nautical miles of 132	9,108
	15,083
Travel expenses 7%	1,055
Total for the pilotage	16,138

### Example 3: Piloted distance: Kalundborg Road to Kalundborg Port

Vessel  
LOA, LG 169.50 m  
Breadth extreme, BR 23.75 m  
Deepest draught 9.20 m  
Factor, LG\*BR 169.50 x 23.75 = 4025

According to the distance table in Part 4, the distance between Kalundborg Road and Kalundborg Port is 6 nautical miles.

According to the table for supplements and mileage charge in Chapter 3, factor 4025 corresponds to line 16.

According to the draught table in Chapter 3, at a draught of 9.20 m the amount for the position seven lines under line 16 (= line 23) should be charged.

With line 23 as the input parameter in the table for supplements and mileage charge, a supplement of DKK 3,400 and a price per nautical mile of DKK 132 should be charged.

The price of the pilotage is then:

Basic fee:	2,575
Supplement to basic fee	3,400
6 nautical miles of 132	792
	6,767
Travel expenses 7%	473
Total for the pilotage	7,240

### Example 4: Piloted distance: Shifting in Kalundborg Port

Vessel  
LOA, LG 169.50 m  
Breadth extreme, BR 23.75 m  
Deepest draught 9.20 m  
Factor 169.50 x 23.75 = 4025

The piloted distance during shifting is less than one nautical mile and is not rated.

According to the table for supplements and mileage charge in Chapter 3, factor 4025 corresponds to line 16.

According to the draught table in Chapter 3, at a draught of 9.20 m the amount for the position seven lines under line 16 (= line 23) should be charged.

With line 23 as the input parameter in the table for supplements and mileage charge, a supplement of DKK 3,400 should be charged.

The price of the pilotage is then:

Supplement to basic fee	3,400
Travel expenses 7%	238
Total for the pilotage	3,638

### **Example 5: Piloted distance: Shifting in Kalundborg Port**

Vessel  
LOA                    90.30 m  
Breadth extreme    12.80 m  
Deepest draught    4.10 m  
Factor     $90.30 \times 12.80 = 1155$

The piloted distance during shifting is less than one nautical mile and is not rated.

According to the table for supplements and mileage charge in Chapter 3, factor 1155 corresponds to line 8.

According to the draught table in Chapter 3, at a draught of 4.10 m the amount two lines under line 8 (= line 10) should be charged.

With line 10 as the input parameter in the table for supplements and mileage charge, a supplement of DKK 900 should be charged.

The price of the pilotage is then:

Supplement to basic fee    900

Since the supplement is less than the amount for an hour's shifting, this is taken from the table for basic fee, supplements to basic fee, mileage charge, shifting and demurrage.

Minimum fee                2,161  
Travel expenses 7%        151  
Total for the pilotage      2,312

### 3. Table for basic fee, supplements to basic fee, mileage charge, shifting and demurrage

Basic fee for all vessels	: 2,575
Cost of an hour's shifting	: 2,161
Demurrage per hour commenced	: 1.579

	LG * BR	Mileage charge	Supplement to basic fee
1	Under 284	92,00	0
2	284-352	92,00	100
3	353-414	92,00	200
4	415-578	92,00	300
5	579-766	92,00	400
6	767-933	92,00	500
7	934-1123	92,00	600
8	1124-1331	92,00	700
9	1332-1589	92,00	800
10	1590-1878	92,00	900
11	1879-2202	92,00	1000
12	2203-2527	92,00	1200
13	2528-2878	92,00	1400
14	2879-3209	92,00	1600
15	3210-3625	92,00	1800
16	3626-4209	97,00	2000
17	4210-5100	102,00	2200
18	5101-6232	107,00	2400
19	6233-7411	112,00	2600
20	7412-8764	117,00	2800
21	8765-10619	122,00	3000
22	10620-13916	127,00	3200
23	13917-20425	132,00	3400
24	Over 20425	137,00	3600
25		142,00	3800
26		147,00	4000
27		152,00	4200
28		157,00	4400
29		162,00	4600
30		167,00	4600
31		172,00	4600
32		177,00	4600
33		182,00	4600
34		187,00	4600
35		192,00	4600
36		197,00	4600

#### Guidelines:

The rate table applies to vessels with a draught between 0 and 3.49 m. For vessels with a deeper draught, the following apply:

For vessels with a draught between 3.50 m and 3.99 m, the values 1 line under the factor LB\*BR apply.

For vessels with a draught between 4.00 m and 4.49 m, the values 2 lines under the factor LB\*BR apply.  
For vessels with a draught between 4.50 m and 5.49 m, the values 3 lines under the factor LB\*BR apply.

For vessels with a draught between 5.50 m and 6.49 m, the values 4 lines under the factor LB\*BR apply.  
For vessels with a draught between 6.50 m and 7.49 m, the values 5 lines under the factor LB\*BR apply.  
For vessels with a draught between 7.50 m and 8.99 m, the values 6 lines under the factor LB\*BR apply.

For vessels with a draught between 9.00 m and 10.49 m, the values 7 lines under the factor LB\*BR apply.  
For vessels with a draught between 10.50 m and 11.99 m, the values 8 lines under the factor LB\*BR apply.  
For vessels with a draught between 12.00 m and 13.49 m, the values 9 lines under the factor LB\*BR apply.

For vessels with a draught between 13.50 m and 14.99 m, the values 10 lines under the factor LB\*BR apply.  
For vessels with a draught between 15.00 m and 16.49 m, the values 11 lines under the factor LB\*BR apply.  
For vessels with a draught between 16.50 m and 17.99 m, the values 12 lines under the factor LB\*BR apply.

For vessels with a draught of 18.00 m and above, the values 13 lines under the factor LB\*BR apply.

The vessel's length extreme (LG) is multiplied by the vessel's breadth extreme (BR). This gives you the factor LG \* BR.  
The amount per piloted nautical mile is set out in the column "mileage charge" on the basis of the found factor LG \* BR.  
The supplement to the basic fee is set out in the column "Supplement to basic fee" on the basis of the found factor LG\*BR.
